

## Superfund Site Strategy Recommendation

Region 6

Site Name: El Reno Roundhouse Area Site Number: OKD 987073475Alias Site Name(s): Rock Island LineAddress: North of El Reno on the east side of US HWY 81City/County or Parish/State/Zip: El Reno/Canadian/OK/73036

## Recommendation:

- ☐ 1. No further remedial action planned under Superfund.
- ☒ 2. Further pre-remedial investigative action needed under Superfund:

PA \_\_\_\_\_  
SSI xx \_\_\_\_\_  
LSI \_\_\_\_\_  
Other \_\_\_\_\_  
To be performed by \_\_\_\_\_

Priority: High \_\_\_\_\_  
Medium XX \_\_\_\_\_

- ☐ 3. Action may be appropriate under other authority:
- NPDES \_\_\_\_\_ SPCC \_\_\_\_\_ 404 \_\_\_\_\_ TSCA \_\_\_\_\_  
UIC \_\_\_\_\_ SMCRA \_\_\_\_\_ STATE \_\_\_\_\_ RCRA \_\_\_\_\_  
OTHER \_\_\_\_\_

## Discussion: PA

The El Reno railyard being investigated in this report is the former roundhouse site where heavy maintenance likely occurred. The soil may be contaminated with heavy metals in the paint shed area and there is a tar pit which may contain spent solvents, waste oils and coal tars from washing railcars and engine maintenance. Also located on site are several disposal pits and wastewater lagoons. This site has existed for 100 years or more, and past historical uses are speculative. Stressed vegetation and possible spill areas are visible both on the ground and in aerial photos. OSDH estimates there is a minimum of 800 to 1000 cubic yards of waste soil. There are no restrictions to the site, and evidence indicated juveniles had been on the property. Ground water can be as shallow as 5 feet in the area and there is potential for contamination of the local aquifer. There are numerous targets who use local wells for drinking. Because of the potential danger to ground water and also on-site contamination further investigation of this site is recommended in the form of SUPERFUND FILE
